

System Implementation

System Implementation

System Implementation

Due to successful system implementation can be best accomplished by users-and-system mutual adaptation, therefore, 8 provides different environments for incremental system implementation such as below:

8 incremental system implementation approach can avoid forcing the user groups that have not yet had sufficient concrete experience to specify concrete requirements, which will in turns can avoid unnecessary frustration and waste of implementation efforts.

Training, Deployment and Production

8 can be deployed with single or multiple interconnected modules in a cloud environment. All modules are highly customizable. You can select to have only a single production cloud environment or multiple environments (e.g., production with hot-failover, development, testing and disaster recovery).

For the user groups that are capable of learning the system during the incremental stages, they can roll out the system as long as they establish ownership and track adoption. For the user groups that involve more complex rollout, they are recommended to follow the following process and acquire training and consulting services from us as needed.

8 can provide best combination of standard products & redevelopment services for enterprise management and over 500 corporations in Asia are using our following modules on-premises or SaaS:

8 SRM : Supplier Management, e-Procurement and e-Tender
